

## Settings in Car Plate Server for sending emails via gmail account

Below are the steps to follow to use a gmail account for sending emails by Selea CPS.

### 1 - password generation for gmail APPs

In order to generate the password for the gmail APP, follow the steps below.

Connect to your gmail account (the one you want to use in the software CPS) and proceed as shown in the images below:

Google Account

Search Google Account

- Home
- Personal info
- Data and privacy
- Security**
- People and sharing
- Payments and subscriptions

---

- About

**click HERE**

### How you sign in to Google

Make sure you can always access your Google Account by keeping this information up to date

2-Step Verification	On since	>
Password	Last changed	>
Google prompt	1 device	>
2-Step Verification phones		>

**click HERE**

Backup codes

← 2-Step Verification

- Authenticator app**  
Use the authenticator app to get verification codes at no charge, even when your phone is offline. Available for Android and iPhone.
- Security Key**  
A security key is a verification method that allows you to securely sign in. These can be built in to your phone, use Bluetooth or plug directly into your computer's USB port.

Devices that don't need a second step

You can skip the second step on devices that you trust, such as your own computer.

**Devices you trust**  
Revoke trusted status from your devices that skip 2-Step Verification.

[REVOKE ALL](#)

**click HERE**

App passwords

App passwords aren't recommended and are unnecessary in most cases. To help keep your account secure, use 'Sign in with Google' to connect apps to your Google Account.

**App passwords**  
None

← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device for which you want to generate the app password.

Select app      Select device

- Mail
- Calendar
- Contacts
- YouTube
- Other (Custom name)

**GENERATE**

**1 - click HERE**

**2 - click HERE**

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device for which you want to generate the app password.

CarPlateServer ×

**1 - insert the name you want to use**

**2 - click HERE**

**GENERATE**

Generated app password **1 - select and copy**

Your app password for your device

**grrf hror krtq enrh**

**How to use it**

Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-character password shown above. Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.

**2 - click HERE** → **DONE**
